

Certificate of Conformity

This is to Certify INSULMAX® Retrofit Wall Insulation Method

Product Description

The INSULMAX® Retrofit Wall Insulation Method is a controlled design method for creating plans and specifications for a building consent to install INSULMAX® in the walls of existing buildings. INSULMAX® insulation is a soft, white blown mineral insulation material that achieves an R value of 2.5 - 2.8/100mm.

The controlled design method includes a prescribed method for assessing the existing building and identifying any work that must be done prior to the installation of INSULMAX® insulation, in order for the requirements of s112 of the building Act 2004 to be met. The report that is produced as a result of this evaluation must be provided to the BCA as part of the building consent application. The INSULMAX® Retrofit Wall Insulation Method also provides a declaration on completion of the work that the "Work Required" identified on the INSULMAX® existing building assessment report has been undertaken and the building work has been completed in accordance with the building consent.

For clarity, certification covers the controlled design method and the INSULMAX® Insulation building material.

The INSULMAX® Retrofit Wall Insulation Method may also be used to support an application for exemption from building consent under Schedule 1 s2 of the Building Act 2004.

Complies with the Building Code of New Zealand:

When installed in accordance with the conditions and limitations of this certificate, the INSULMAX® insulation will comply with;

B1 Structure – B1.3.1, B1.3.2, B1.3.3 (a),

B2 Durability – B2.3.1 (a),

F2 Hazardous Building Material – F2.3.1.

The building work will comply with;

E2 External Moisture – E2.3.2.

When installed in accordance with the conditions of this certificate, the INSULMAX® insulation will contribute to compliance with;

C3 Fire Affecting Areas Beyond the Fire Source – C3.7 (a),

H1 Energy Efficiency – H1.3.1 (a), (b), H1.3.2E.

The existing building will continue to comply with the following Building Code Clauses to at least the extent as before the installation of INSULMAX® insulation;

B1 Structure – B1.3.1,

C2 Prevention of Fire Occurring – C2.2,

E2 External Moisture – E2.3.2, E2.3.5,

G9 Electricity – G9.3.1,

H1 Energy Efficiency – H1.3.1.

Subject to the following conditions and limitations:

1. All aspects of the INSULMAX® Retrofit Wall Insulation method must be carried out or supervised by a person certified by Insulmax NZ Limited.
2. The INSULMAX® License Holder must provide a signed declaration (to be provided to the BCA as part of an application for building consent or Schedule 1 s2 exemption), that all conditions of the CodeMark certificate have been met.
3. The INSULMAX® existing building assessment report must be signed by a person who has been certified by Insulmax New Zealand Limited (to be provided to the BCA as part of an application for building consent or Schedule 1 s2 exemption).
4. The agreement of the Building Owner to complete the "Work Required" identified on the INSULMAX® existing building assessment report must be obtained and provided to the BCA as part of an application for building consent or Schedule 1 s2 exemption.
